THE R-GO MOTORIZED PLATFORM

IDEAL FOR A RANGE OF ENVIRONMENTS

TRANSPORT EQUIPMENT EFFORTLESSLY

MOTORIZE YOUR TOOLBOX

MOVE ITEMS EFFICIENTLY

The R-Go Motorized Platform has been specially designed to safely transport heavy loads over long distances. Built to the highest quality standards, the R-Go Platform boasts superior durability and motor reliability. The motor can run for 20km/12.5 miles on battery. The premium-quality, ultra-quiet casters significantly dampen vibrations and provide high-performance rolling. Upon releasing the handle, the electromagnetic brakes stop the toolbox immediately on both flat and sloped surfaces. The large non-slip surface also keeps any item securely in place during transportation.

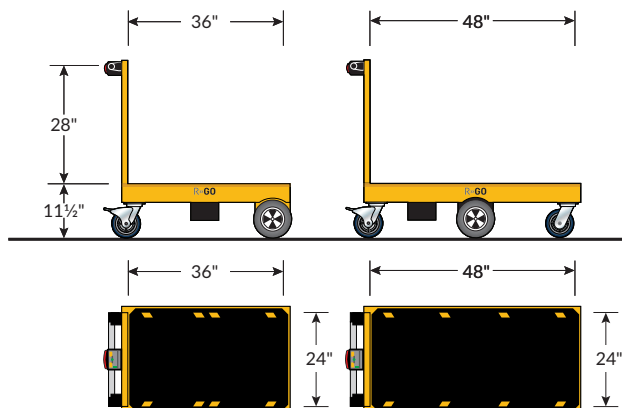

HELPS PREVENT MUSCULOSKELETAL DISORDERS (MSDS)

The R-Go Motorized Platform has anchoring zones for rapid and secure installation of a toolbox. This means you can motorize your existing R toolbox.

With Rousseau's R-Go Motorized Platform, you boost your efficiency without compromising on safety and security. When considering monetary and human costs – as well as the short-, medium- and long-term effects of MSDs – a motorized platform is a wise choice.

- The motorized platform can climb slopes of up to 6°.
- This is equivalent to a ratio of about 1 in 10 (vertical : horizontal).

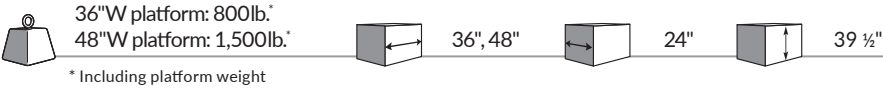

USABLE SPACE

The specified width and depth correspond to the platform's usable space. For the actual width, add 2" (e.g., 36"W + 2"W = 38"W).
